

ezyLED 12V 3030 Series

ezyLED reduces driving circuit dramatically. All ezyLEDs are connected in parallel, and directly driven by a conventional 12V DC voltage source without the needs of the driver IC and passive components. With ezyLED so easy to use, users only have to focus on the design of the lamps. Inventory management of components is minimized.

3030 products operate over a wide voltage range (Figure 3). Luminous intensity remains constant for $10.4V < V_{in} < 24V$, and maintains approximately 50% of its nominal value when input voltage drops to 9 volts.

3030 products support over temperature protection (OTP) by reducing input current and hence the luminous intensity when the device temperature exceeds $120^{\circ}C$ (Figure 2). For long-term reliability, sufficient heat dissipation mechanism in lamp design is required to ensure ezyLED operates in the rated temperature range ($-40^{\circ}C \sim 85^{\circ}C$).

Features

- **Patented LED chip design with built-in driving IC.**
- **Using conventional 12V DC voltage sources.**
- **All ezyLEDs connected in parallel**
- **Luminance and Correlated color temperature (CCT) remains constant while the input voltage varies over an extensive range.**
- **Built-in rectification for non-polar applications.**
- **Over temperature protection.**
- **Under the working voltage (10.8V-18V), the brightness is modulated by the built-in IC.**

General Characteristics (Ta=25°C @ Vin =12V)

| Parameters | Symbol | Min. | Typ. | Max. | Unit |
|---------------------------------------|-----------------|------|------|------|--------|
| Luminous Flux@20mA (0.3W) | Φ_v | | 25 | | lm |
| Luminous Flux@50mA (0.5W) | Φ_v | | 50 | | lm |
| Luminous Flux@100mA (1.0W) | Φ_v | | 100 | | lm |
| Luminous Flux@110mA (Red) | Φ_v | 39 | 42 | 44 | lm |
| Luminous Flux@110mA (Green) | Φ_v | 71 | 75 | 79 | lm |
| Luminous Flux@110mA (Blue) | Φ_v | 25 | 26 | 27 | lm |
| Viewing Angle (FWHM) | $2\theta_{1/2}$ | | 120 | | degree |
| Thermal Resistance (Junction to slug) | R_{th} | | 15 | | °C/W |

Absolute Maximum Ratings

| Parameters | Symbol | Min. | Typ. | Max. | Unit |
|-----------------------------|----------------|------|------|------|--------|
| Rated Voltage | Vin | 10.5 | 12 | 18 | Vdc |
| Reverse Voltage | | | | 15 | Vdc |
| LED Junction Temperature | T _J | | | 120 | °C |
| Operation Temperature Range | T _c | -40 | | 85 | °C |
| ESD@HBM | ESDHBM | | | 4K | V |
| Allowable Reflow cycles | - | | | 3 | cycles |
| Storage Temperature Range | - | -40 | | 100 | °C |

Notes :

- Parts are tested in pulsed conditions, T_a=25°C. Pulse width is 10ms at rated voltage.
- Tolerance of Luminous Intensity: ±10%
- Maximum Temperature at solder pads (T_c) during operation: 85°C
- The lifetime will be decreased if the operation temperature exceeds the maximum value.

Ordering Information

Notes :

- Maintains a tolerance of +/-10% on flux measurements and +/-2 on CRI measurements.
- Parts are tested in pulsed conditions, T_a=25°C. Pulse width is 10ms at rated test voltage.

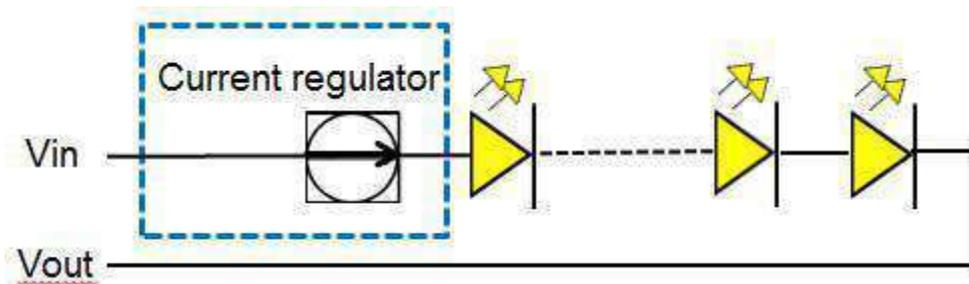

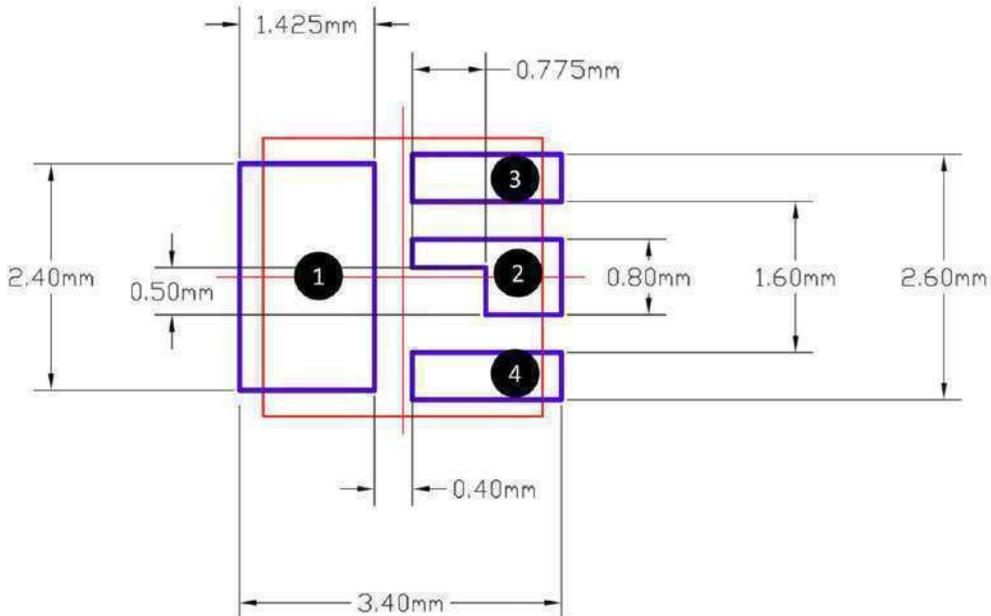

Figure 12 Recommended Solder Pad Dimensions

| Pad | Function |
|-----|--------------------------------|
| 1 | Anode |
| 2 | Cathode |
| 3 | NC pad (isolated with pad 1&2) |
| 4 | NC pad (isolated with pad 1&2) |

Notes:

1. All dimensions are in mm.
2. Tolerance is +/- 0.02mm unless otherwise specified.
3. Drawings are not to scale.
4. The other pads on 3030 devices are NC isolated with pad 1&2. (No solder paste)
5. Do not handle 3030 devices by the lens. Incorrect force applied to the lens may lead to the failure.
6. This solder pad dimension could be applied to both lead-frame types of ezyLED.

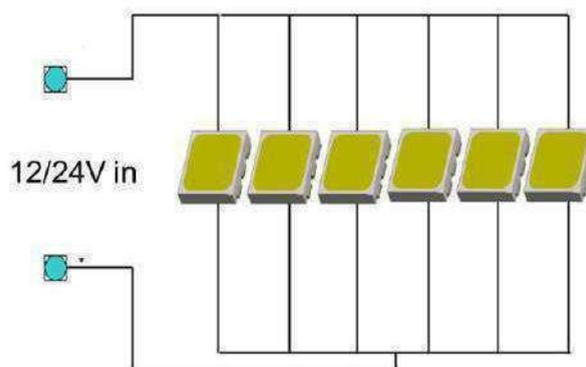

Figure 14 EMC Package

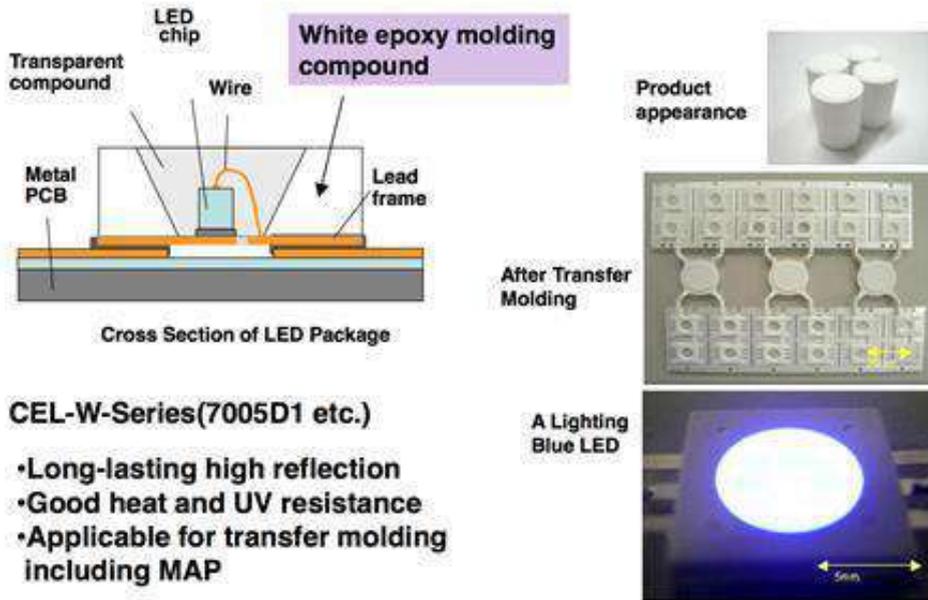

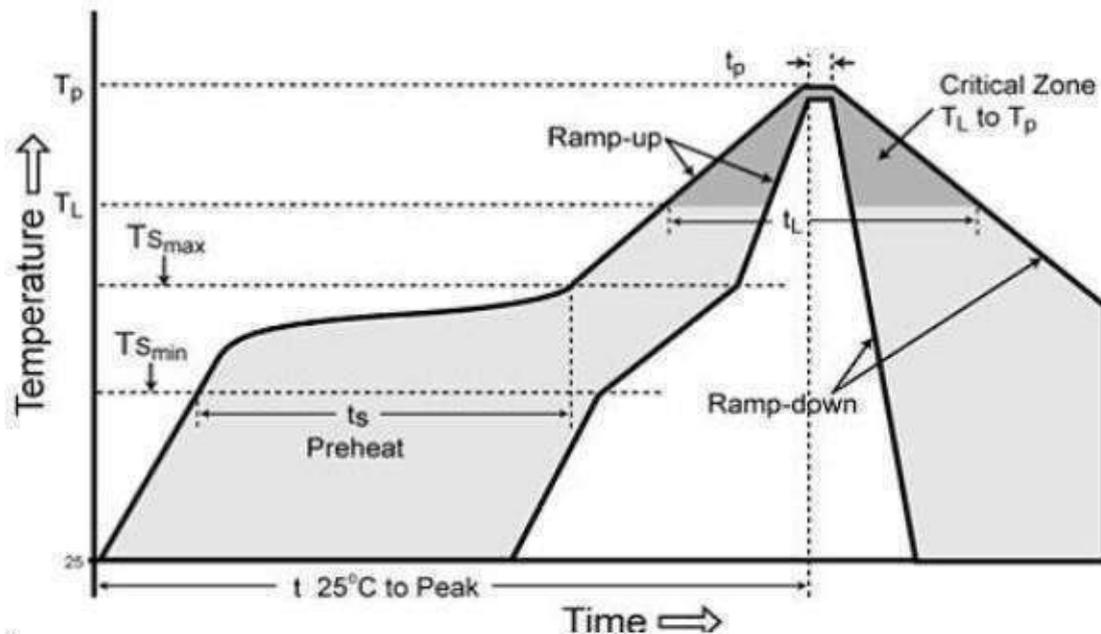

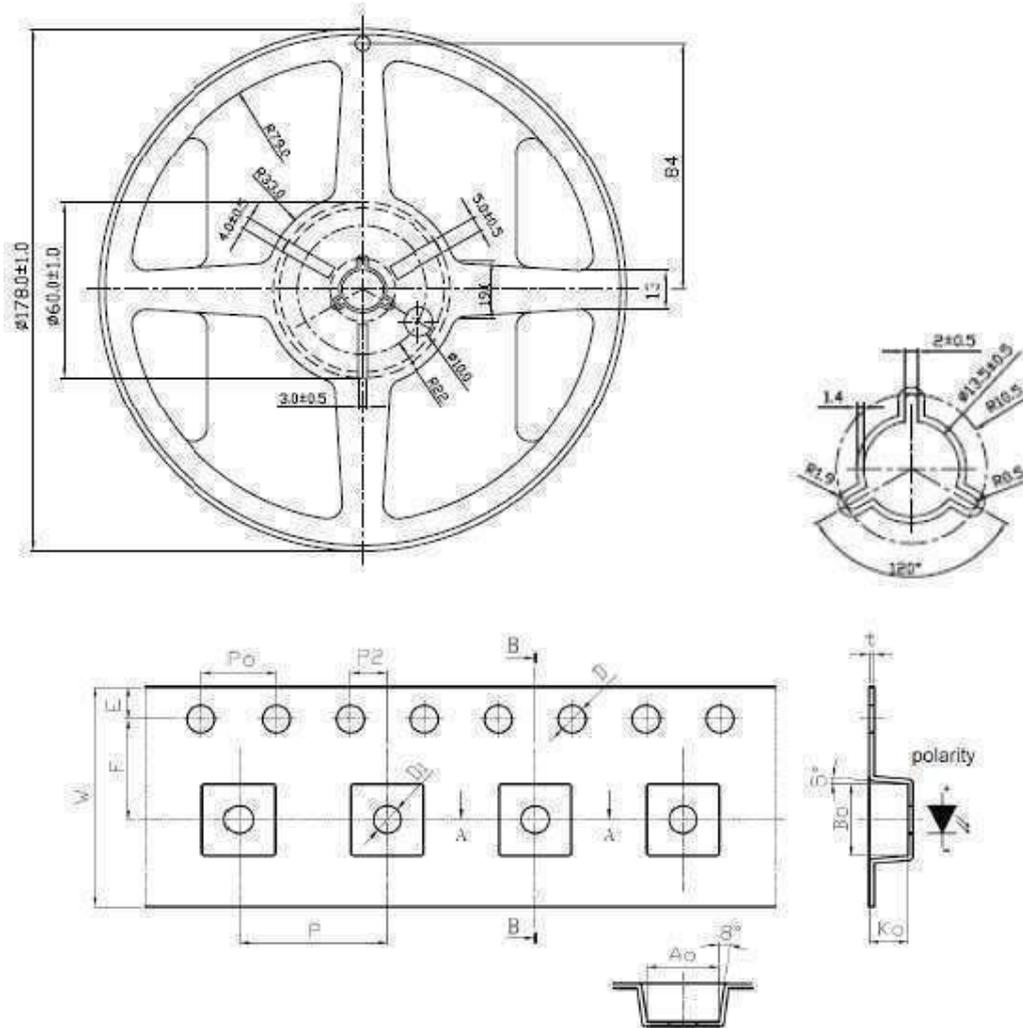

Figure 15 Soldering Condition (Reference: IPC/JEDEC J-STD-020C)

zyLED ZE1C series are compatible with IPC/JEDEC J-STD-020C, following the parameters listed below. Recommends that users follow the recommended soldering profile as the general guideline.

| Profile Feature | Pb-Free Assembly |
|---|------------------|
| Average ramp-up rate (TL to TP) | 3°C/second max. |
| Preheat | |
| Temperature Min (T _{min}) | 150°C |
| Temperature Max (T _{max}) | 200°C |
| Time (min to max) (ts) | 60-180 seconds |
| Time maintained above: | |
| Temperature (TL) | 217°C |
| Time (tL) | 60-150 seconds |
| Peak/Classification Temperature (T _p) | 240°C |
| Time within 5°C of actual Peak Temperature (tp) | 20-40 seconds |
| Ramp-down Rate | 6°C/second max. |
| Time 25°C to Peak Temperature | 8 minutes max. |
