

# Bright Every Day, Disinfects Every Way -UV LED

## UV Technology

UV LEDs have increasingly found their way into a multitude of industries and applications. American Bright is proud to offer our line of products for both UVC/UVA wavelengths. These products have been implemented on rigid modules and flexible strips for projects with tight space constraints.

# UVC LEDs

American Bright is excited to announce our new UVC products; a 3535-ceramic package, with multiple intensity selections, which allows use in various germicidal applications. Customization is possible for flexible strips or rigid modules; just contact our team and we can tailor a solution to fit your specific needs!

## Featured Product

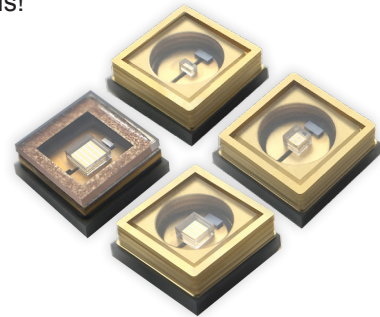

### AB-3535UC Series

#### Product Specifications

Package: 3535 Ceramic  
Wavelength: 270-280 nm  
Power Output Range: 2.5-40 mW

#### Product Applications

Water and air disinfection, surface disinfection, medical devices

# UVA LEDs

American Bright offers UVA LED components as well as UVA strips/modules to meet customer needs. Silicone resin/ quartz glass are available depending on power requirements.

## Featured Product

### UVA Light Strip

#### Product Specifications

UVA PLCC: 5050  
Roll Standard: 60 LEDs per meter/5 meter  
Viewing Angle: 120 degrees  
Available Options: IP20, IP65, and IP68

#### Product Applications

Curing (industrial, nail, printing), black lighting, counterfeit detection, dentistry
